

NGAC G907-43 is a high viscosity and thixotropic adhesive system that is specifically formulated for structural bonding applications. It has been qualified for industrial, electronic and aerospace applications.

NGAC G907-43 is recommended for any application requiring a high fill adhesive requiring a no-sag performance with superior adhesion and mechanical and structural strength. It is easily mixed and cured at room temperature and provides excellent adhesion to glass, ceramic, metal and plastic. This adhesive also passes NASA outgassing requirements.
